of

Philadelphia

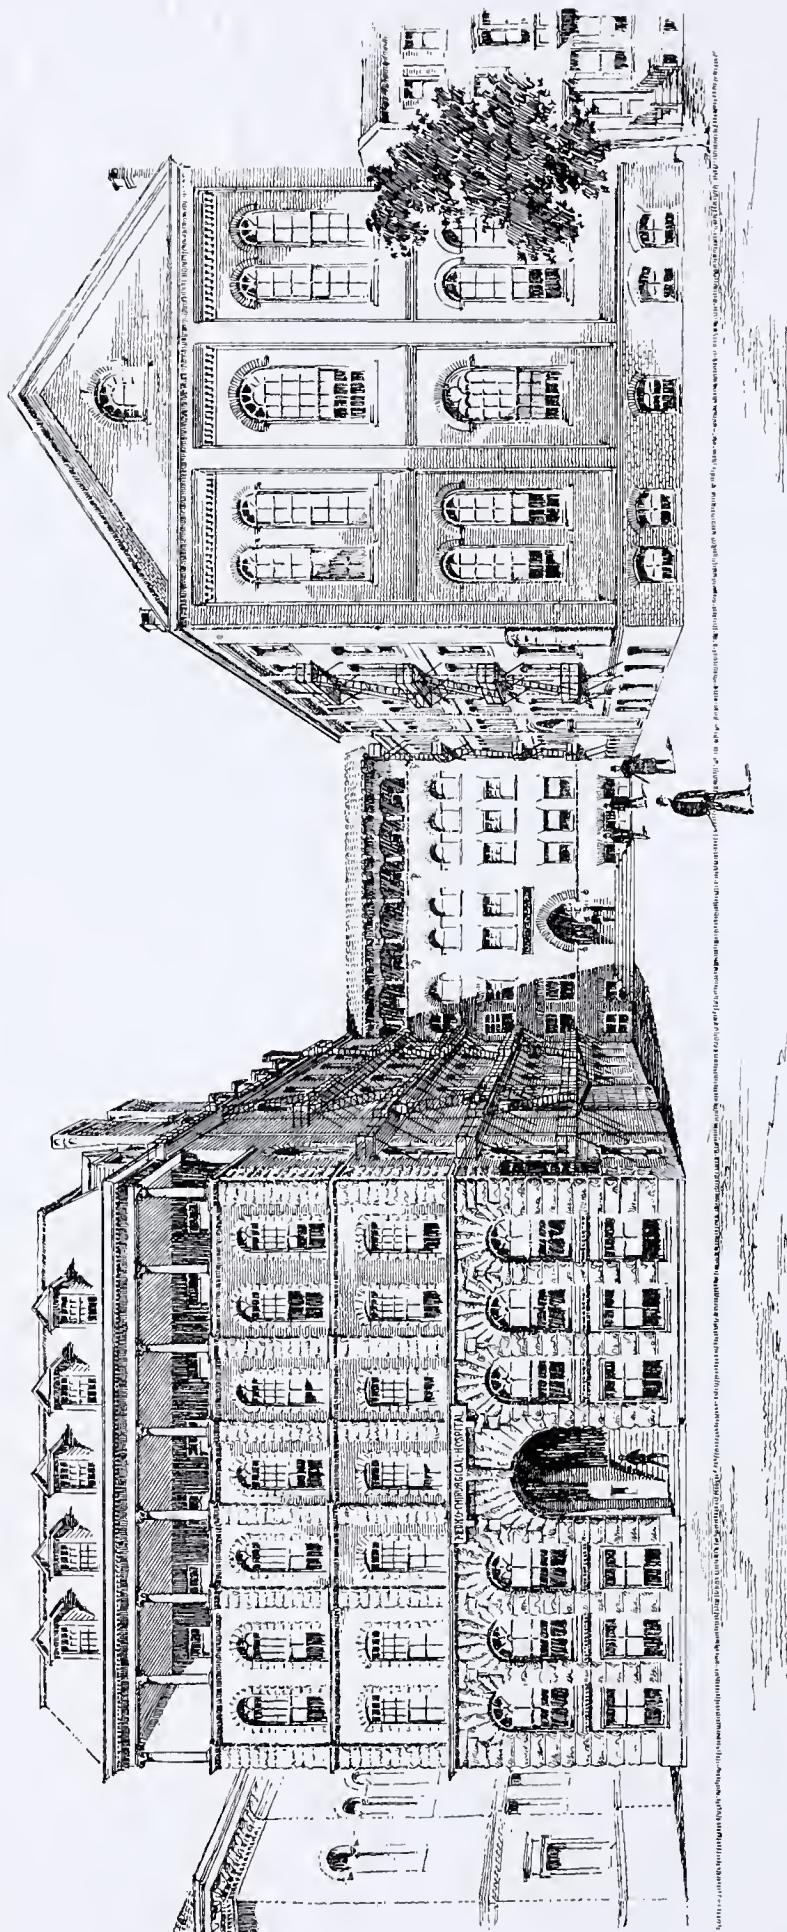

Eighteenth and Cherry Streets

For the Year 1896

Digitized by the Internet Archive  
in 2018 with funding from

This project is made possible by a grant from the Institute of Museum and Library Services as administered by the Pennsylvania Department of Education through the Office of Commonwealth Libraries

### THE MEDICO-CHIRURGICAL HOSPITAL.

CHERRY STREET BETWEEN 17TH AND 18TH.

The building on the left is the side of the Clinical Amphitheatre.

The MEDICO-CHIRURGICAL HOSPITAL is nonsectarian. It is open day and night for the reception of the sick and injured. The Free Dispensary service is open daily.

The Maternity Department, situated at Eighteenth and Cherry Streets, receives free of charge all poor women who are in need of care at the time of their confinement.

The Children's Department, situated on Eighteenth Street, is devoted exclusively to the treatment of poor children suffering from disease or deformity.

No contagious diseases are admitted in the Hospital.

## FORM OF BEQUEST FOR PERSONAL ESTATE.

I, —— ——, give and bequeath to the Medico-Chirurgical Hospital, of the City of Philadelphia, the sum of ——, to be paid to the Treasurer for the use of said Hospital.

---

## DEVISE OF REAL ESTATE.

I, —— ——, give and devise unto the Medico-Chirurgical Hospital of the City of Philadelphia, all that (here describe the property with the appurtenances).

---

## FORM OF BEQUEST FOR ENDOWMENT OF A FREE BED.

I, —— ——, give and devise and bequeath unto the Medico-Chirurgical Hospital, of the City of Philadelphia, the sum of Five Thousand Dollars in full and free of taxes, for the Endowment of a Free Bed.

---

Life Membership.....	\$ 50 00
Annual Membership .....	5 00
Endowment of a Free Bed.....	5000 00
Or an annual payment of.....	300 00

---

Subscriptions or donations may be sent to the Treasurer of the Board of Trustees, Dr. L. Webster Fox, 1304 Walnut Street, Philadelphia, or contributed through any member of the Board, or the Superintendent.

---

***Contributions and Legacies are most earnestly  
solicited.***

E. L. KLOPP, M. D.,                    LOUIS N. SCHAPPERT, M. D.

## LABORATORIES.

### Clinical Medicine.

#### **DIRECTOR.**

JAMES M. ANDERS, M. D.

#### **CHIEF ASSISTANT.**

GEORGE W. PFROMM, M. D.

The Laboratory of Clinical Medicine is devoted to the study and observation of the Medical Cases in the Hospital according to the most modern methods.

Scientific examinations are made of the urine, blood, sputum and the various excretions and secretions of the body. Accurate records are kept of each case and careful observations made from time to time, thus aiding materially in clearing the diagnosis of obscure cases as well as in treating the patients in the Hospital.

---

### BACTERIOLOGY AND PATHOLOGY.

#### **DIRECTOR.**

JOSEPH McFARLAND, M. D.

#### **CHIEF ASSISTANT.**

W. W. BABCOCK, M. D.

The Laboratory of Bacteriology and Pathology conducts the microscopical examinations of diseased tissues before operation to determine upon the radical or palliative course the surgeon shall pursue, and after operation to aid in an accurate estimate of the benefits that can be expected. In this laboratory also the discharges from all kinds of diseased tissues and the secretions of diseased organs are microscopically, culturally, and chemically investigated by the most recent methods.

## EXPERIMENTAL THERAPEUTICS.

### **DIRECTOR.**

JOHN V. SHOEMAKER, M. D.

### **CHIEF ASSISTANT.**

HERMAN D. MARCUS, M. D.

The laboratory of Experimental Therapeutics is established for scientific research in this particular department of medicine. In recognition of the great importance of promoting the best interests of the patients in the Hospital, facilities are provided in this laboratory for the study of drugs and remedial agents in the treatment of diseases. By this means we at once do away with the former practice of employing new remedies upon patients before carefully studying their value by scientific experiments.

---

## RADIOGRAPHIC LABORATORY.

### **DIRECTOR.**

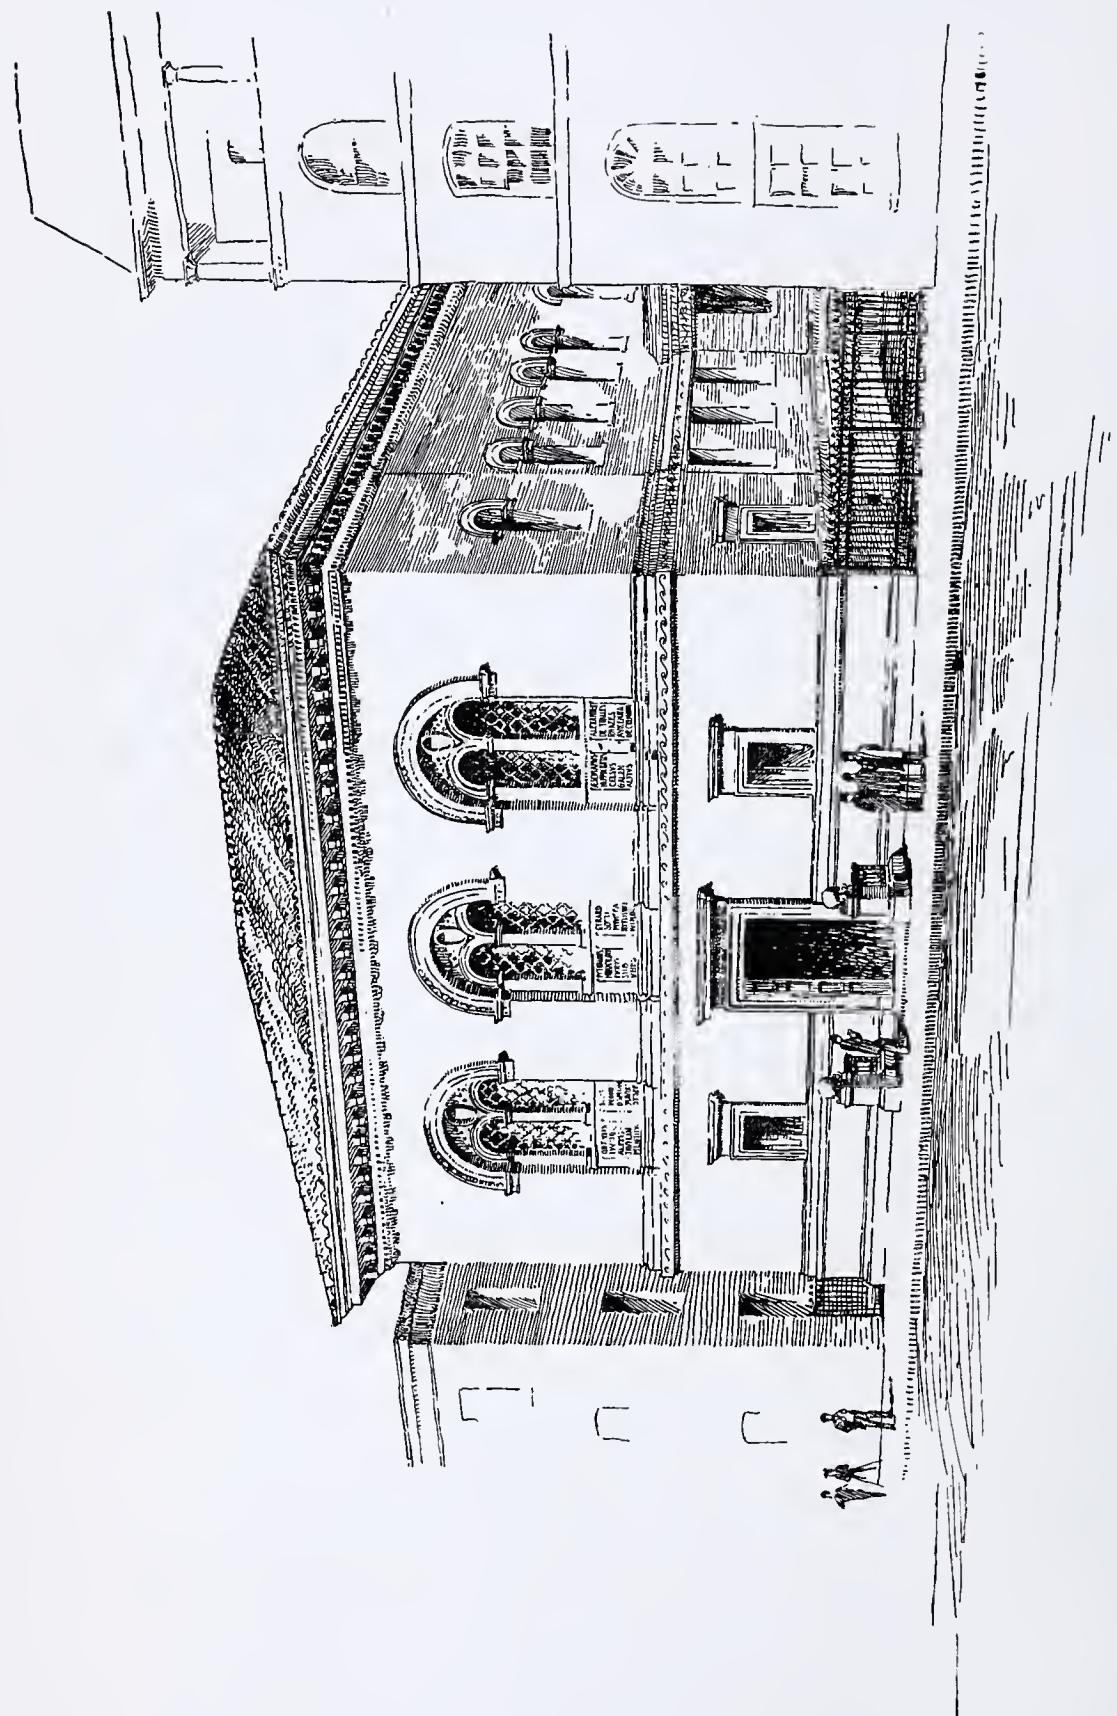

ERNEST LAPLACE, M. D.

### **CHIEF ASSISTANT.**

CHARLES L. FURBUSH, M. D.

A complete laboratory for the application of the Röntgen rays to the various requirements of surgery has been established. The work is carried on with the most recent and approved apparatus and a radiographic record is kept of fractures, deformities, foreign bodies, etc., which have been examined in the laboratory.

### THE NEW CLINICAL AMPHITHEATRE.

The building to the right is a corner of the Hospital; that on the left is the rear part of the Maternity Department.

Twelfth Annual Report  
OF THE  
President of the Board of Trustees.

---

*To the Contributors of the Medico-Chirurgical Hospital:*

The year just elapsed must be reckoned as a notable one in the history of our Institution. Its work, in all the departments has extensively increased; its sphere of usefulness in the relief and care of the sick, has broadened to a degree not surpassed by any other institution. But more than all, is the building of the new Clinical Amphitheatre, now nearing completion, which promises to surpass in beauty of design and in the perfection of its appointments any existing building of a similar character. Thus, the generosity of the State of Pennsylvania, has helped us to rank among the most modern and progressive Hospitals.

The present condition of the Hospital is very gratifying, and I cannot refrain from tendering to you and to the members of the Hospital Staff, my acknowledgment and appreciation of the untiring energy shown in the discharge of your duties to the Institution.

C. WILLIAM BERGNER.

## Report of the Superintendent.

---

The year of 1896 will be memorable in the history of the Hospital in the improvements which have been made.

On the twelfth of May the corner stone of the New Clinical Amphitheatre was laid with Masonic ceremonies. Addresses were made by the Hon. Daniel H. Hastings, Governor of Pennsylvania, and Hon. Charles Warwick Mayor of Philadelphia. During the summer the buildings on 18th Street were fitted up as a Maternity and Children's Department.

A new boiler for heating purposes, and also for an electric light plant of sufficient power for furnishing 1000 lamps has just been finished. It will in addition to giving better service save a large amount yearly to the Hospital for gas.

Through the auspices of the Ladies Aid Society, a marked change has been made in the appearance of the general Hospital. All the hallways, corridors, and the rotunda have been painted, new floors laid, and the first floor wainscoted.

Dr. John H. Egan who has served as Registrar for several years, was elected Senior Resident Physician in January.

The Resident Physicians, Drs. Samuel Noll, Clarence T. Fairies, Frank Roberts, B. Frank Shires, and Walter Hibshman, whose terms had expired were succeeded by Drs. Stewart Reeser, E. H. Porch, James F. Donnelly, Henry C. Polkinkhorn, and William J. Rush.

Miss Minerva T. Daily resigned as head of the Training School, and was succeeded by Miss L. V. Ludekens who also resigned. Her place was filled as Directress of Nurses by Mrs. Katharine A. Taylor, formerly of St. Timothy's Hospital at Roxborough.

With the development of an institution comes the need of new conveniences and necessities, and we require now an incinerating plant, an ice machine, a separate building for a Nurse's Home, better rooms for the Resident Physicians, and a new elevator. The contract has already been given out for a new kitchen, and a delirium tremens ward. The statistics of the Hospital will be found on another page.

Respectfully submitted,

ODIN R. EDWARDS.

# Report of the Ladies Aid Society OF THE Medico-Chirurgical Hospital.

The Ladies Aid Society of the Medico-Chirurgical Hospital has had an unusually busy year, and the results of their labors, financially, will be seen from the Treasurer's report. The money collected in different ways is exactly twice the amount made in 1895 and three times the amount made in 1894, the first year of the society. This proves not only that the members are more active, but that the charity itself has been brought more prominently before the public.

Nine new members have been added to the roll.

The principal work accomplished by the Board has been the furnishing of private rooms, the painting and re-flooring of the interior of the Hospital building, and the equipping of the four diet kitchens with steam tables and fixtures. The general supplies of the Hospital have been very greatly augmented by large quantities of linen, groceries, money, etc.

Various entertainments have been given during the past year, the chief of which were a benefit performance in February, by the "DeWolf Hopper Opera Company," when a large sum of money was realized, and in April a reception to Mr. Joseph Jefferson, who subsequently presented his cheque to the Board to furnish a private room in his name. This has been done, and the Joseph Jefferson Room is now one of the most appreciated gifts the Hospital has ever received.

In April also, Mrs. W. Frank Haehnlen gave a Progressive Euchre Party at the Hotel Walton, which brought in a sum of money sufficient to paint the Maternity Department.

In December, Mrs. Lewis held a Doll's Fair, the proceeds of which will be devoted to providing cots in the Children's Department.

The Cooking Lectures have been continued under Mrs. Rorer's direction to the mutual benefit of nurses and invalids.

The ladies desire to thank the large circle of friends who have been so exceptionally generous this year, especially John J. DeZouche & Co., William Boyd & Sons and many others.

The proceeds of Donation Day, both in money and provisions, far surpassed their expectations.

They trust that their proposed efforts in the coming year may meet with even greater success than heretofore. Although much has been done to assist those who voluntarily care for the sick and distressed in this Hospital, it is not a tithe part of what might be accomplished.

The Children's Department, especially, is in need at times of many articles of comfort required by these poor little sufferers. Donations for this special department are therefore very urgently asked for.

MRS. L. WEBSTER FOX,  
*President.*

## REPORT OF THE TREASURER.

Mrs. W. Frank Haehnlen, Treasurer of the Ladies Aid Society, from January 1, 1896 to December 31, 1896.

## DONATIONS

1896.

A. Armstrong & Co., 1 barrel spinach, 1 basket parsnips.  
Angier Chemical Co., 14 bottles Emul-Petroleum, 4 bottles Glymol.  
Mrs. Alfert, books.  
Anonymous, magazines,  $\frac{1}{2}$  doz. samples anaemol,  $\frac{1}{2}$  doz. samples liquid wheat, 14 books.  
Mrs. Ashcorn, scrap-books and flowers.  
Mr. Henry L. Atkinson, magazines.  
Mr. B. F. Banes, magazines.  
Mr. James Brady, 1 barrel artesian well water.  
Mr. M. J. Breitenbach, two 6 pint bottles Pepto Mangan "Gude".  
Madam Barret, Illustrated papers.  
Miss N. Barren, 1 pair braces.  
Mrs. C. William Bergner, flowers.  
Mrs. Brown, old muslin.  
Mrs. Boltz, magazines and papers.  
Dr. M. Branson, 6 bottles Maltine.  
Mr. Thos. Bradley, 2 doz. jellies.  
Band of Hope, Chester Co., scrap-books.  
Christian Temperance Union, magazines.  
A. A. Carey, 11 books.  
W. H. Clewell, periodicals.  
Mrs. S. Connell, box of flowers.  
Mrs. Diehl, 1 large screen.  
Mrs. F. A. Dahis, 1 screen, 1 basket, books.  
Miss Annie Day, flowers.  
Electrozone Co., 1 doz. bottles Electrozone.  
Eskays Albumenized Food, 1 doz. pkgs.  
Mrs. Falls, magazines.  
Dr. C. L. Furbush, 1 pincette, 100 tags,  $\frac{1}{2}$  doz. assay bottles,  
 $\frac{1}{2}$  doz. gas bottles.  
Charles Graef & Co., N. Y., 15 bottles Apenta Water.  
Mrs. E. B. Gleason, 6 towels, 4 infant shirts, 3 pairs socks.  
W. H. Hostelly & Co., 9 bottles hypophosphites, 3 pint bottles hydriodic acid.  
Mrs. Edward H. Hance, pictures, 6 towels.  
Mr. Edward H. Hance, 2 cases claret, 1 box lemons, 4 doz. oranges,  
10 lbs. sugar.

Horleck's Malted Milk, 30 bottles.  
Mrs. Hansell, periodicals and books.  
Mrs. Wm. C. Hamilton, 17 towels for dispensary.  
Holy Trinity Mission Guild, flowers.  
Misses Humphreys, flowers for men's ward.  
Johnson & Johnson, 3 pkgs. Kolafra. 3 oz. extract Kola.  
David Jamieson, 5 gall. indigo blue.  
Chas. McKee, 2 scrap books.  
Dr. Isidor Koch, 2 pairs drawers, old muslin.  
Mrs. K. Kelty, 3 cans clam juice.  
Mrs. Saml. T. Kerr, 6 towels.  
Lester Milk Co., 50 quarts Ice Cream for Thanksgiving Day.  
Mr. Fred'k Lehman, 1 pair crutches, 1 brace.  
Ladies Aid Society, fans.  
Rev. J. A. Lippincott, magazines.  
Mrs. E. Lafitte Lewis, 10 jars preserves, 13 glasses jelly, 5 pin cushions.  
Mrs. Mearkle, magazines.  
Mr. McKenna, carnations.  
Mrs. Mary McCurdy, 1 brace.  
Mrs. Oliver, pamphlets and magazines.  
Phospho Albumen Co., Chicago,  $\frac{1}{3}$  doz. Phospho Albumen.  
Mrs. Polkinhorn, *Home Journals*.  
Mr. Saml. Pennock, flowers.  
Mr. J. B. Pace, 4 bags flour.  
Miss H. Ritner, pkg old linen.  
Mrs. J. V. Shoemaker, 1 doz. towels.  
Dr. Benj. T. Shimwell, 1 lb. silicated soda.  
Smith, Kline, French Co., 1 bottle aconite normal fluid, 1 bottle nux vomica normal fluid, 1 bottle digitalis normal fluid, 1 bottle belladonna leaves, 1 bottle fluid ext. ipecac, 1 bottle fl. ext. ergot.  
Stearns, drugs.  
Mrs. Stockton, *Harper's Young People*.  
Chas. W. Thomas, flowers.  
Mr. Vaux, magazines.  
Wm. M. Wright, 1 brazier.  
Henry K. Wampole, 1 doz. liquid wheat.  
Mrs. Watson, reading matter.  
Mrs. M. E. Wallace, 2 egg beaters, 1 ice mallet, 2 ice bags, 1 lemon squeezer.  
Mrs. Wedell, magazines.  
Mrs. Sarah Whitaker, 1 box jellies.

Mr. Wm. Wilson, books and periodicals.  
Women's Christian Association, old linen.  
Y. P. S. C. E. First Baptist Church, reading matter.

The eruptive diseases (measles, scarlatina, small-pox, etc.), the special knowledge demanded for their proper nursing.

*Special Course in Sick Cookery.*

# MEDICO-CHIRURGICAL HOSPITAL.

## Training School for Nurses.

### *Information for Applicants for Admission.*

Application for admission to the School must be addressed to the Directress of the Training School, Cherry Street, below Eighteenth.

Candidates must be over twenty and under thirty-five years of age. They must be in good health and must refer to two responsible persons, who shall certify in writing as to their moral character.

As vacancies occur the Directress will notify candidates to present themselves at the Hospital to undergo an examination for admission. This examination will refer both to their physical condition and education; the latter embraces the common English branches.

Applicants who successfully pass the preliminary examination will be admitted to the School for a period of two months upon probation. At the end of the probationary term they will be admitted as Pupil Nurses upon recommendation of the Directress.

Pupil Nurses must sign an agreement to remain three years in the School (including the term of probation) and to obey the rules; they may, however, be discharged at any time for misconduct or inefficiency.

Probationary and Pupil Nurses will receive board, lodging, washing, and medical attendance free.

Accepted candidates coming to the Hospital must bring with them a sufficient supply of clothing, which must be in good order. All clothing must be plain and marked with the full name. The following is a list of the articles required: Six sets of under-clothing, three night-dresses, six pairs of stockings, three dark underskirts of washable material, twelve handkerchiefs, three outdoor dresses, one wrapper, one pair of dress shoes and one bag for soiled clothes.

Probationary and Pupil Nurses are required to wear the uniform of the Training School, which will be given them at cost price, about ten dollars.

During the period of probation, nurses will receive no compensation, but after entering the School as Pupil Nurses, they will receive a compensation of six dollars per month.

#### HOURS OF DUTY.

Day Nurses from 7 A. M. to 8 P. M. For rest and recreation they are allowed one hour daily; from 2 to 10 P. M. weekly; and four hours on Sunday.

Night Nurses from 8 P. M. to 7 A. M. They are required to be in bed from 9 A. M. to 4 P. M.

Each nurse is allowed two weeks vacation a year.

The Trustees of the Hospital have recently completed a dormitory for Nurses, which is thoroughly fitted out with all the latest sanitary appointments. It is separated from the general Hospital, thus affording quiet and privacy when off duty. The dormitory comprises eighteen bed-rooms, each one of which accommodates from two to three nurses. There are also bath and toilet rooms, a large and well ventilated sitting or reception room, and a covered loggia for recreation.

## REQUIREMENTS FOR GRADUATION.

First.—Three full years spent in the Training School and a satisfactory examination on the subjects taught during the course.

Second.—Only the members of the Training School whose term expires before the date of the Commencement exercises will be considered eligible for graduation.

Third.—Members of the Training School whose term expires after the date of graduation will be given a certificate, but will have to wait until the following Commencement before receiving their diploma.

The course of instruction as carried out in the School, gives a thoroughly practical and scientific education in all the departments of general and special nursing.

The School offers excellent facilities to women who desire to fit themselves for nursing in private families. The Hospital, in addition to its extensive wards, contains a large number of private rooms, thus giving to the Nurses the exceptional advantage of being educated also in private nursing.

### FORM OF APPLICATION FOR ADMISSION.

This Application is to be filled out in the handwriting of the Candidate, and sent to the Directress of Nurses.

1. Name in full, .....
2. Address in full, .....
3. Are you married, single or widow? .....
4. Present occupation, .....
5. Age last birthday, .....
6. Date and place of birth, .....
7. Weight and height, .....
8. If married or a widow? have you children? .....
9. How many children? and how are they provided for? .....
10. Are you free from domestic responsibility, so that you will not be liable to be called away? .....
11. Where educated? .....
12. Are you strong and healthy? .....
13. Are your eyesight and hearing good? .....
14. Have you any physical defects? .....
15. Where were you last employed? and how long? .....
16. Have you ever been in any Training School? If so, where? .....
17. Give the names in full, and addresses of two persons to be referred to, .....

Having read and clearly understanding the foregoing paper, I declare the above statement to be correct.

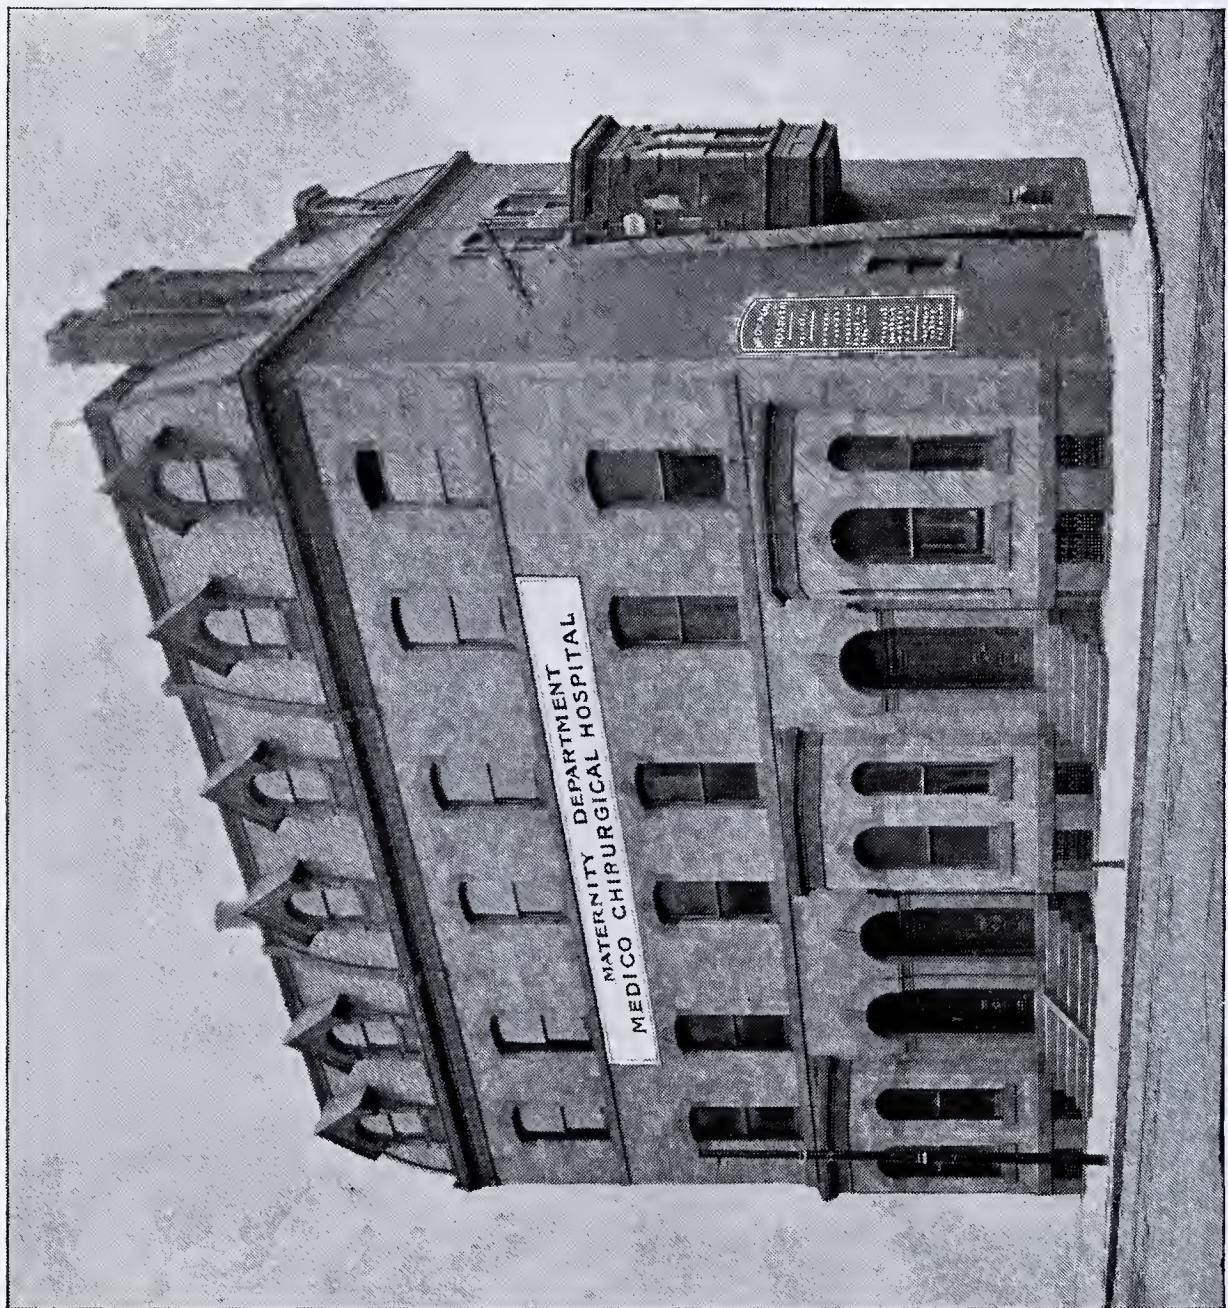

DATE, .....

SIGNED, .....

*Candidate.*

PRESENT ADDRESS, .....

MATERNITY DEPARTMENT  
Medico-Chirurgical Hospital  
Eighteenth and Cherry Sts.

# MATERNITY DEPARTMENT OF THE Medico-Chirurgical Hospital.

The Maternity Department of the Hospital is situated on the corner of Eighteenth and Cherry Streets. It is entirely separate from the general hospital, thus affording every opportunity of guarding against infection.

The interior of the building has been entirely reconstructed to meet the exacting demands of modern aseptic ideas in the management of labor. With a capacity for forty beds, there are special wards provided for women waiting to be confined, and also for patients during convalescence. A separate room is devoted entirely to the delivery of patients.

The Dispensary service of the department occupies the rooms on the first floor of the building.

The plumbing and sanitary arrangements of the Hospital have been carefully constructed with the view of lessening to a minimum the dangers of infection during labor and convalescence. That this object has been accomplished is shown by the report of the obstetrician in charge of the department.

The marvelous revolution in the results obtained during the last decade in reducing the death rate in child-bed is essentially due to the strict application of modern aseptic methods. The surroundings of the poorer classes in their homes are, as a rule, unhygienic, and it is impossible, even with the most careful attention to asepsis, to obtain the same results as are achieved in a maternity hospital.

The Trustees look to a generous public to assist them in enlarging the work and usefulness of this department of the hospital.

CHILDREN'S DEPARTMENT  
OF THE  
Medico-Chirurgical Hospital.

The Children's Department of the Hospital is situated on Eighteenth above Cherry Street. The building is separate from the general Hospital and thoroughly adapted in its construction for the careful treatment of sick and injured children. There are well ventilated and cheerful wards, bath-rooms and a special diet kitchen for the preparation of food not cooked in the general kitchen of the main Hospital.

The work which has been done in this department during the past year has been very satisfactory to the Trustees, who have recognized for a long time the urgent necessity for a special hospital in which poor little children suffering from medical and surgical diseases may have proper care and skilful treatment.

The expense of maintaining this department has been a severe tax upon the treasury of the Hospital owing to the many actual requirements of the children, and the Trustees look confidently to the friends of the Hospital for assistance during the coming year.

CHILDREN'S DEPARTMENT  
Medico-Chirurgical Hospital  
Eighteenth Street

REPORT  
OF THE  
CHILDREN'S DEPARTMENT  
OF THE  
Medico-Chirurgical Hospital,

1896.
